About ACT Contracting

ACT Contracting aspires to lead the industry through a customer-focused approach, innovation, and the ability to respond positively to challenging requirements. Sustainability and inclusive growth are embedded in our vision and strategic plans. We remain independent of product affiliations to maintain our core competence and deliver the best solutions to our clients. Our solutions are supported by technologically advanced, high-quality products that comply with local and international engineering standards.

Vision

To be a leading industrial solutions provider by integrating cutting-edge technologies, delivering seamless and innovative services, and becoming the preferred partner for businesses seeking quality, reliability, and long-term value.

Mission

To provide exceptional products and services that empower our clients to succeed in today's dynamic industrial environment. We are committed to adopting the latest technologies, maintaining the highest standards of quality and safety, and delivering personalized support and technical expertise that create lasting partnerships and sustainable growth.

Why Choose Us

- Customer-Focused Solutions
- Fast & Flexible Project Execution
- Innovative Technologies
- Experienced Technical Team
- International Engineering Standards
- Quality & Safety Commitment

Our Services

Civil Construction

Building Construction

Complete building construction solutions covering planning, execution, and project management — from foundation to final completion.

Concrete Works

Foundations, slabs, retaining walls, structural concrete, equipment foundations, and specialized industrial concrete applications.

Structural Works

Structural steel fabrication, erection, and installation compliant with international engineering standards.

Maintenance & Rehabilitation

Concrete repairs, structural strengthening, refurbishment, waterproofing, protective coatings, and preventive maintenance programs.

Mechanical Services

Fabrication & Installation

Complete fabrication and installation for industrial structures, equipment, piping systems, and mechanical components.

Equipment Erection

Erection and installation of heavy industrial equipment — machinery, tanks, vessels, pumps, and conveyors.

Industrial Maintenance

Preventive, corrective, and shutdown maintenance solutions that maximize reliability and minimize downtime.

Piping Works

Fabrication, installation, testing, and commissioning of piping systems in carbon steel, stainless steel, HDPE, and specialized materials.

Electrical Works

Power Distribution Systems

Installation and maintenance of transformers, switchgear, distribution panels, and cable networks.

Instrumentation

Installation, calibration, and maintenance of control systems, field instruments, sensors, and automation equipment.

Electrical Installations

Complete installations covering power, lighting, grounding, and auxiliary systems to international standards.

Testing & Commissioning

Inspections, functional testing, calibration, troubleshooting, and final commissioning for safe handover.

HDPE Services

HDPE Liner & Piping Installation

Geomembrane liners, HDPE pipelines, containment systems, ponds, tanks, and process facilities.

Pressure Testing

Comprehensive testing and inspection to verify safety, performance, and operational integrity.

Welding & Jointing

Certified butt fusion, electrofusion, and extrusion welding for strong, leak-proof joints.

Maintenance Services

Inspections, leak detection, rehabilitation, welding repairs, and system upgrades.

Equipment Rental

Heavy Earthmoving Equipment

Excavators · Bulldozers · Loaders · Graders · Rollers

Light Equipment

Generators · Compressors · Concrete mixers · Plate compactors · Lighting towers

Industrial Machinery

Process plant machinery · Manufacturing equipment · Maintenance machinery

Specialized Tools

Welding machines · Lifting equipment · Cutting tools · Testing instruments

Project Support Equipment

Scaffolding systems · Temporary facilities · Material handling · Water tanks & generators · Lighting systems

Products

Protective Coatings & Repair Solutions

Chemical & acid-resistant coatings · Abrasion-resistant systems · Water immersion coatings · Epoxy coatings

Industrial Valves & Mechanical Components

Cast steel valves · Gate & globe valves · Check valves · Rising stem ball valves · Specialty valves

Industrial Spare Parts Supply

Mechanical · Electrical · Instrumentation spare parts · Industrial consumables · OEM & customized solutions

Industrial Consumables & Accessories

Fasteners & hardware · Safety equipment · Industrial tools · Maintenance consumables · Site accessories

Specialized Engineering Products

Customized fabrication · Mining equipment components · Process plant accessories · Industrial support systems

Industries We Serve

- Power Generation & Transmission
- Chemical Manufacturing
- Infrastructure
- Railways
- Oil & Gas
- Mining
- Process Industries
